

## Kite Glass Case Study

# Food Central, Fosse Park, Leicester

### Processes included

- CNC Holes Notches
- Polishing
- Toughening
- Heat Soaking
- Laminating
- Specified Logo Positions on all panels

### Summary

Fosse Park is a well-known, out-of-town shopping park in the Leicester area. Since April 2019, it has been undergoing a £168m extension development, which has added 140,000sq ft of retail space to the existing site. The Fosse Park West & Food Central developments are managed by The Crown Estate and were developed in partnership with local contractors Bowmer + Kirkland, who were involved in the original development over thirty years ago.

Within this revitalisation project, the public areas across Fosse Park were also redesigned to echo the site's historical background as a brewery and integrate it into the Soar Valley landscape. Reflecting on The Crown Estate's commitment to reach Net Zero by 2030, this extension also included 5,000m<sup>2</sup> of planted areas, including green walls, hedgerows, trees, insect hotels and wildflower meadows.

To help bring the outside in, Kite Glass was awarded the contract to supply a total of 220m<sup>2</sup> of standard and low iron heat-soaked, laminated glass panels for the entrance atrium and internal facades. We have produced and delivered the panels with the following breakdown:

- 32 panels of 16.89mm SentryGlas® low iron glass, which has been heat-soaked, toughened, laminated and CNC processed. This equates to an area of 105.43m<sup>2</sup>, and weighting 4,291.81tons.
- 27 panels of 17.50mm SentryGlas® low iron glass, which has been heat-soaked, toughened, laminated and CNC processed. This equates to an area of 62.17m<sup>2</sup>, and weighting 2,562.57tons.
- 20 panels of 20.89mm SentryGlas® glass, which has been heat-soaked, toughened, laminated and CNC processed.

Due to the existing government restrictions, the new development was launched on April 12<sup>th</sup> 2021, in line with the national reopening of non-essential retail.
